

# 3-D WOVEN JOINTS

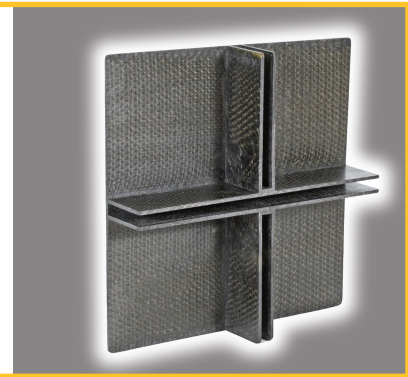

## THE OPTIMAL BLEND OF STRENGTH, DURABILITY AND STRUCTURAL INTEGRITY

Bally Ribbon Mills has perfected the science and art of 3-D continuous weaving. Our industry-leading research, design and fabrication expertise enables us to solve your specific challenge by approaching it in ways that no one has imagined before.

Our Advanced Products Group has developed technologies to fabricate structures such as “Pi,” double “T,” “H” and other complex net shapes.

We make it a regular practice to take what was previously unattainable and make it reality. If you're looking for a new structure, or new ways to lower weight and cost without sacrificing integrity and

performance, look no further than 3-D woven joints from Bally Ribbon Mills.
